Appligent AI Design System Handoff

Swiss-modern | PDF-ready | March 2026

---

1. Overview & Principles

Appligent AI's design system reflects Swiss-modern precision—clear grids, purposeful color, minimal noise, and measurable outcomes. Inspired by Linear.app and Ramotion, it builds trust through restrained use of color, distinctive typography (Space Grotesk & Inter), and micro-interactions targeted for performance (all <150ms, snappy cubic-bezier transitions).

> ***Guiding Principles***
>
> - *Every UI decision is metric-backed (conversion, engagement, compliance).*
> - *Color-use is disciplined: teal for function, amber for emphasis only (<10% of surface).*
> - *Typography is never substituted: Space Grotesk (headings, 500/600), Inter (body, 400/500), strict 4px baseline grid.*
> - *Responsive at all breakpoints (360, 600, 960, 1280, 1600px) with optical alignment adjustments.*
> - *Accessibility (WCAG AA) and GDPR/FADP compliance are non-negotiable.*

---

2. Color System

Name	Hex	Usage	Light Sample	Dark Sample
Primary	`#00BFA6`	CTAs, icons, hero backgrounds	■ Teal BG	■ Teal BG
Highlight	`#FF8A00`	KPIs, badges, buttons (<10%)	■ Amber	■ Amber
Ink	`#0B1A1F`	Main text, nav, outlines	■ Charcoal	■ Charcoal
Fog	`#F5F7F8`	BG, cards, field fills	■ Light Grey	■ Light Grey
Cloud	`#D7E2E6`	Dividers, subtle fills	■ Cloud	■ Cloud
Focus	`#1F6FEB`	Input focus, accessibility	■ Blue	■ Blue

Gradients

- **Hero Gradient**:
  `linear-gradient(135deg, #021013, #0B1A1F)`
- **CTA Band Offset**:
  Teal base `#00BFA6` with 8px amber stripe.

> *Color usage is audited for sufficient contrast and motion safety. Teal is always paired with neutral or white space for functional clarity.*

---

3. Typography

Font Pairings

Font	Usage	Weight(s)	CSS/Token
Space Grotesk	Headlines, metrics	500/600	`--font-display`
Inter	Body, form, nav	400/500	`--font-body`

Scale & Line Heights

Token	Size (px/rem)	Line Height	Typical Usage
`text-xs`	13 / 0.8125rem	1.5	Annotations, captions
`text-sm`	15 / 0.9375rem	1.5	Button, input, nav
`text-base`	17 / 1.0625rem	1.6	Body, forms, lists
`text-lg`	20 / 1.25rem	1.4	Card titles, section hdg
`text-xl`	24–28 / clamp	1.2–1.3	Major headings, hero
`text-hero`	40–60 / clamp	1.1	Main hero, key metrics

> *All typography aligns to a 4px baseline. No substitutions—widen letter-spacing for Space Grotesk at larger sizes.*

CSS Tokens:

```
:root {
  --font-display: "Space Grotesk", system-ui;
  --font-body: "Inter", system-ui;
  --text-xs: 0.8125rem;
  --text-sm: 0.9375rem;
  --text-base: 1.0625rem;
  --text-lg: 1.25rem;
  --text-xl: clamp(1.5rem, 1.2vw, 1.75rem);
  --text-hero: clamp(2.5rem, 4vw, 3.75rem);
}
```

---

4. Core UI Elements & Components

Navigation

- **Pattern**: Sticky top bar, logo left, nav links center/right, CTA button right.
- **Spacing**: `space-4` (16px) between links, `space-8` (32px) outer.
- **Accessibility**: Focus ring (`#1F6FEB`), keyboard trap, skip-to-content.
- **Metric:** Navigation click analytics; “Book a call” CTA tracks `nav_cta_click` .

Hero Module

- **Composition**: 12-col grid; 7col text/CTA, 4col proof (logos or KPI chips).
- **Accent**: Gradient BG, main CTA pill style, automation metric badge.
- **Annotations**: Quantified outcome visible, minimum LCP <1.5s.
- **Spacing**: `space-6` / `space-8` stack; CTA above fold.

Cards (Expertise Grid)

- **Responsive**: 3x2 desktop, 2x3 tablet, stacked mobile.
- **Features**: Icon "notch", bold title, 120 char max copy, stat reveal on hover.
- **Spacing**: `space-3` (12px) grid, align to 4px baseline, radius `soft`.
- **Analytics:** Card click = `expertise_tile_click`.

Timeline (Process Steps)

- **Desktop**: Horizontal sticky, 5 steps (Discover→Govern), icon for each.
- **Mobile**: Accordion steps.
- **Motion**: Step-in animation <150ms.
- **Spacing**: `space-6` horizontal gap, step width flexible.
- **Analytics:** Step viewed = `timeline_step_view`.

CTA Band

- **Treatment**: Full-bleed teal, thin amber offset (8px), centered CTA + secondary link.
- **Spacing**: Padding `space-12` (48px), minimum button height 48px.
- **Copy Constraint**: ≤80 characters.
- **Analytics:** CTA = `cta_band_cta`

Register Form (GDPR Lead Form)

- **Form Fields**: Name, Work Email, Company, Scope, Consent (checkbox), Optional Notes.
- **Compliance**: Explicit consent & data residency, privacy link ≤32px.
- **Spacing**: Fields vertically spaced `space-4` (16px), group boxes `space-8` (32px).
- **Error Handling**: Inline, color `highlight` for error, clear focus.
- **Anti-spam**: Hidden field `workstyle`.
- **Analytics:** Submit = `lead_submit`
- **Sample Snippet:**

```html
<label class="consent">
  <input type="checkbox" required>
  <span>I agree to Appligent AI storing my data in Switzerland...</span>
</label>
<p class="privacy-text">
  We operate under GDPR & Swiss FADP. <a href="/privacy">Privacy policy</a>.
</p>
```

---

5. Interactive States & Motion

- **States**:
  - *Hover*: Subtle shadow (`shadow-card`), background tint (2–4%).
  - *Focus*: Blue outline (`#1F6FEB`), always visible, 2px thickness.
  - *Pressed*: 96% scale, softened shadow, fast transition (<120ms).
- **Motion**:
  - All UI feedback <150ms using `cubic-bezier(0.32, 0.72, 0, 1)`
  - No excessive bounce or opacity fade.
  - Disable animations if reduced-motion is set.
- **Consistency**:

- Animation speeds and easing must not diverge by section; tokens enforced.

---

6. Accessibility Checklist & Asset Requirements

WCAG & Compliance

Requirement	How to Achieve / Test
Text contrast AA	Check all text vs bg/accents
Keyboard navigation	Nav, cards, forms, CTA accessible
Focus style	Always visible, tokenized color
ARIA labels, landmarks	All nav and forms marked up
Responsive at all breakpoints	Test at 360, 600, 960, 1280, 1600
Error feedback	Inline; role="alert" where needed
Consent & Privacy	Checkbox + privacy link ≤32px

Asset Checklist

- Fonts (Space Grotesk, Inter) self-hosted, subsetted.
- SVG icons: monochrome, scalable, tested on dark/fog backgrounds.
- Favicon and OpenGraph image present (+ alt text).
- All section metrics/KPI text pre-approved and logged.
- Form endpoints must log and store explicit consent.

> ***Implementation Notes:***
>
> - *Copy this document into your md→PDF generator; no further styling necessary.*
> - *Each table and code block is mapped to system tokens for handoff.*
> - *All annotations explain intent, compliance, and measurement.*
> - *Before dev start: QA each component using this checklist and provide feedback via Linear.*
